

TORNADO STRIKES 2 FARMS

TWISTER BLOWS DOWN BARN AND ORCHARDS

What at first appeared a young tornado, developed into a real twister style along the Lincoln Highway between Mokena and Frankfort Tuesday afternoon.

Following a thunderstorm in the morning, another storm arose in the latter part of the afternoon and suddenly a funnel shaped cloud loomed up in the southwest and started bouncing about like a rubber ball.

Two Mokena men were eye witnesses to the actions of the twister. They were driving in a truck on the road north of Frankfort and when near the four corners, they saw the tail of the twister come down to earth and struck the Michigan Central railroad west of Frankfort, then it bounced up in the air and headed northward. Mr. August Hentsch and Jimmie Homerdig who were driving the truck thought the twister was heading for Mokena when suddenly the funnel shaped cloud switched back and struck the Christ Warning farm, where a large barn size 36 X 65 feet was literally blown to bits. A tool shed also was destroyed and a few other buildings were moved from the foundations. A big tree standing between the house and barn was uprooted. A number of other trees were also uprooted. Luckily the dwelling house was spared. The Warning family did not know the havoc that the tornado had wrought in their yard until the storm was over. They did not notice any particular noise when the twister swept thru their yard. The stock was all out in the pasture, so there was no loss in that line. The building loss is about \$8,000. Mr. Warning carried tornado insurance.

After finishing its job quickly the twister bounced in the air again and Mr. Hentsch and Mr. Homerdig were horrified to see the funnel like cloud heading toward them. They left the truck and ran to the Larson garage at the four corners. By the time they got to the door, the wind was so strong that it threw Mr. Hentsch against the building. Mr. Homerdig got the door open and then dragged in Mr. Hentsch. The twister just switched past the rear end of the garage and took an out building with it which was latter found in a neighboring field torn to pieces. The twister continued on its havoc creating way, and came down again on the Henry Geuther farm where an orchard was its target. The trees were uprooted and blown down.

From this farm the storm continued northeastward until it hit Harvey, where thousands of dollars worth of damage was done.

Hail also accompanied the storm. Passengers on the west bound Rock Island train due at Mokena at 5 o'clock in the evening reported that the train ran into a heavy hail storm at Midlothian and that the hail stones were large and driven with great force by a strong wind against the windows of the coaches. Some of the window panes were cracked by the hail. A very heavy rain fell all over this section.

The sudden shifting of the wind from the northwest is said to have been the saving factor for Mokena, for had this not happened the tornado would have struck Mokena, as it was heading directly this way. The sudden shift in the wind forced the twister back along the Lincoln Highway.

Many people are visiting the Warning farm to see the tornado's devastating work. This is the first time in the history of Frankfort township, as far back as the oldest inhabitants can recall, that a storm of this nature has swept thru it.

These storms are causing property owners to think more about tornado insurance.

An Up to Date Subject

An up to date subject for people who are thinking up to date thoughts. Why be content to be a back number and know nothing of the great struggle now taking place in the religious world. All the most intelligent people are progressing in the reconstruction of religion. Sunday morning the Rev. Benj. T. Duncan will give a lecture at the Frankfort Methodist church on the

Ruben's Rialto Theatre Finest In Middle West

Next week has been set aside as "Greater Joliet Week," with a municipal celebration arranged to feature the opening of the Rubens' Rialto, a de luxe theatre operated by Great States Theatres, Inc., the "down state" unit of Balaban and Katz.

The Rialto, a luxurious house which is known as one of the world's Wonder Theatres, has been almost two years in the course of construction, for it is one of the most elaborate structures of its kind in the country. It has 3,000 seats, and a foyer larger than that of any other playhouse in the United States.

Located at Chicago and Van Buren Streets, in the heart of the business section, the building is an imposing structure. In addition to the theatre, it houses a department store, a number of shops and the five upper floors are in office suites.

A huge stage, which can be enlarged to even greater proportions by the elevation of the orchestra pit to stage level is a feature. The \$200,000 iced air plant, which provides pure cold air throughout the summer months, and the hydrostatic and thermstatic warming cooling and purifying systems, are other features of the theatre.

The sculpturing, done on an elaborate scale, is, in itself a sight worth looking at. Entire Greek legends are carved in marble upon the walls and dome of the interior and upon the walls and ceiling of the foyer grande.

The theatre will open to the public on the night of May 24, at which time the policy of fine feature pictures, novelties and elaborate stage presentations will be introduced. For the opening a great spectacle, "The Evolution of Joliet", from the time of its discovery by Louis Joliet, and Father Marquette, down to the present "Age of Success and Synecopation" will be presented.

A concert orchestra, conducted by Bailey F. Alart, of Washington, D. C., and organ features, on the Barton-Grande, played by Leo Terry, nationally known organist, are other features of the Rubens' Rialto.

Guests from all over the state have been invited to attend the opening and remain for the municipal celebration in which all local interests are participating.

New Lenox To Hold Chautauqua June 15 to 18

New Lenox Chautauqua dates for this year have been set for June 15, 16, 17, and 18. The program which has not been arranged in full, has the added attraction this year of presenting two plays: "Believe Me Xantippe" and "Little Miss Bluebeard", which will be presented over a Chautauqua circuit for the first time.

The Allpress Concert Company unsurpassed in the instrumental Concert field and the Boyd Concert Company equally talented vocal artists, supply the music.

The lecturers listed are, Dr. Dorreen, Dr. John Gray, in his "On The Trail of the Hobo", and Professor Gifford. Watch for definite plans later and do not forget the dates!

HEALTH CLINIC AT JOLIET

Dr. John Mitchell will conduct a free Clinic for crippled children and adults in the Public Health Council rooms, Auditorium Building in Joliet, Ill., on May 26th between 8:30 A.M. and 12 noon.

subject of "Miracle and Law". If you cannot find time to read up on this subject, spend an hour Sunday morning listening to this lecture which is based on the most modern texts by the most eminent writers.

Will Develop Richton Territory

Comprehensive plans for the development of the territory between Richton, the electrification terminus of the Illinois Central Railroad, and Monee, 4 1/2 miles south of Richton, have been initiated thru formation of a permanent organization. Among the real estate firms interested are Loeb & Hammel, Cerf & Ehrenhalt Cowing Bros., Walker & Trankle, Wm. Behrens, Henry P. Kranz & Co. and Frank C. Lemon. An executive committee consisting of Shirley Cowing, Max Loeb, Mr. Lemon and Mrs. Behrens will supervise activities of the new organization.

The principal aim of the group will be to obtain for the territory recognition as a part of the south suburban area primarily affected by the Illinois Central electrification and ultimately to effect extension of the electrification program southward.

The organization will also take an active part in promoting construction of adequate highways in the section. The initial project will be the building of a hard road between Joliet and Crown Point, passing thru the villages of Manhattan Monee and Crown Point and providing an east and west traffic route to the new Washington Park race track near Crete.

The organization will co-operate closely with the newly organized Richton Park Association, just formed by owners in the vicinity of Reuter's Richton Park subdivision south and east of Richton on the famed Sauk trail. A highway project contemplated here is construction of a new boulevard on a line due east from the point where the Sauk trail turns south at Richton Park and the paving of Monee road.

Members of the Richton-Monee Association represent owners of an approximately 3,000 acres east of the Illinois Central and west of the Richton-Monee line. Many of the owners are interested actively in the development farther north in the Flossmoor district.

Opportunities for the large scale development of this section are shown by the extension east and west of the Illinois Central to a greater distance than the Richton-Monee properties are south of the terminus.

In connection with the electrification of the Illinois Central Railroad, suburban service many of the southside villages are undergoing radical changes.

A new I.C. has just completed a new brick suburban station at Hazel Crest. The former station, now remodeled into a school, was the first real estate office in South Harvey, operated by Wm. C. McClintock. Hazel Crest now has excellent suburban service, and also two main highways running thru the village.

Want Advs.

FOR SALE—Water proofed concrete building blocks. Big supply on hand. Best material for building purposes. Carl Miller, Tinley Park, Ill. Tel. 18-J.

FOR SALE—Chevrolet sedan, 1924 model in good condition. Price \$350.00. Brass bed complete with springs and mattress for \$10.00. Call after 6:00 P.M. Albert Boerner, Tinley Park, Ill.

FARROW CHIX May delivery 100 lots Barred Rocks, Single Reds, Anconas \$12.50; White Rocks, Buff Orpingtons, Rose Reds \$13.50; Wyandottes, Minorcas \$14.50; Leghorns \$10.50; Heavy Assorted \$9.50, Light Assorted \$8.50. Special Matings 3c a chick higher. D.T. FARROW CHICKERIES, Peoria, Ill.

Miss Eleanor Funk of Tinley Park Dies In Hollywood, Calif.

Miss Eleanor Funk, aged 23 years, daughter of Mr. and Mrs. J. C. Funk of Tinley Park, died at Hollywood, California Tuesday following a six weeks illness.

Miss Funk graduated from the University of Illinois in June 1925. Last fall she went to Hollywood, California where she taught in the Military Academy and also took a course in the University there. A few weeks ago she was taken ill with Mountain fever which is similar to typhoid fever. Mrs. Funk rushed to her daughter's bedside several weeks ago upon the receipt of a telegram from Hollywood saying she was seriously ill and has been with her ever since. Five doctors were in attendance and the best of nurses, but the young life could not be saved and the end came Tuesday.

Miss Funk was a popular student and made legions of friends. The news of her untimely death came as a big shock to her many friends here.

The funeral party left California on No. 12 Rock Island train and will arrive in Tinley Park Sunday morning at 7:15. Funeral services will be held from the Funk home to the Zion Lutheran church Monday at 1 P. M. standard time, Rev. A. E. Eudenhagen officiating.

Miss Funk is survived by her parents, Mr. and Mrs. J.C. Funk, two sisters, Lorain and Ruth and one brother, Robert and legions of friends.

BAKERY SALE

Ladies Aid of St. John church will hold a bakery sale Saturday afternoon in the church basement.

James LaHue Dies At Frankfort

James Harvey La Hue, aged 82 years, a resident of Frankfort since last fall, died at his home in that village May 18th.

Mr. La Hue was born in New Saulsberry, Indiana, August 31, 1844. In 1882 he was united in marriage with Rebecca Crosby at Corydon, Indiana. He leaves to mourn, his wife, two sons, Alva and Manson, one grand daughter, Lucille, 3 sisters, Mana, Mrs Sally Igert, Matty Siegler, two brothers Edward and Spence.

Funeral services were held Thursday afternoon from the home to the Frankfort M.E. Church, Rev. B.F. Duncan officiating. Burial in Pleasant Hill cemetery.

Mr. La Hue bought the old M. E. parsonage last year and moved here shortly after. He was in apparent good health when he was stricken with paralysis and death came quite suddenly.

State Backs Up New S. W. Highway

Twenty members of the South west Towns Chamber of Commerce attended a meeting in the Cook County Board of Commissioners office in Chicago Monday morning relative to the new Southwest Highway.

Acting President Ona E. McGovern of Mokena, Secretary B. F. Rolfe of Worth and Cook County Supt. of Highways Quilen went to Springfield the same day and on Tuesday morning conferred with the State Highway Department regarding this road. The State has agreed to designate this as a state aid road and will do all possible to back it up.

LOST—A 32 X 6 United States truck tire and rim between Dan Lauffer's and John Schult's places along the Rock Island. \$20 reward to return same to Dan Lauffer, Mokena, Ill.

FOR RENT—Four room flat with soft and running water, electric lights. \$16 per month. Arthur Keuch, Tinley Park, Illinois.

FOR SALE—Baby carriage in good condition. Inquire RX, News-Bulletin.

FOR SALE—30 head broods sows bred to farrow in May. Geo. Gee, Sr., Orland, Ill. Tel. Orland 46-32.

Greater Joliet Week May 24; City to Put on Gala Dress

The week of May 24th has been designated by the Merchants Association of Joliet as Greater Joliet Week in celebration of the opening of the new Rialto Theater. The Rialto is a structure that any city of a million population might boast of, and in order to properly inaugurate this palace of entertainment the business men of the city are banded together with the firm determination to make this week long to be remembered in the annals of the city's history.

The Big Week starts Monday May 24th and to start the opening off auspiciously, band concerts will be held in all sections of the city and fireworks will start the weekly jamboree with the reverberation of mortar bombs in the air which will be heard for five miles around Joliet.

The Merchants will compete for a cup which will be given to the finest decorated window; the public

queen chosen who will appear at the Rialto in the opening stage presentation and be the leader of the parade to be held Thursday evening. The streets are to be decorated with an abundance of flags and the 202nd regiment of the Anti-Aircraft section are sending down a million candle-power search light from Chicago to carry the message of Greater Joliet to the surrounding country for a radius of twenty five miles.

Charles Scheetz and Albert Felman, both on the Administrative Committee of the affair, and their colleagues, are sparing no effort or expense to make this a tremendous event, and accommodations for parking for the thousands of visitors that week is one of the most important items these workers have. This problem however, has been solved perfectly.

May 26 Is "Go To School" Day

On Wednesday, May 26 a cordial invitation is extended to all parents and others interested in our public schools, to visit school. May 26 is "go to school" day for everyone in Mokena.

School starts at 3 p. m., continuing until 6 at which time an hour recess will be given for lunch. After this school will reconvene at 7 and continue till 9 p. m. This is to give everyone a chance to visit the school and watch us work. Please reserve the date mentioned.

It up. It now remains for the Cook County Commissioners to issue building instruction.

New A. & P. Store Opens at Tinley

Tinley Park is showing a good healthy business growth and the latest acquisition in the business line is an A. & P. store which will open for business this (Friday) morning in the Hollstein building west of the Rock Island depot. The new store occupies an ideal location on the concrete highway known as Ridgeland Ave. This makes the 5th store the A. & P. people have opened within a week in Cook County. These stores are nationally known. Read this store's big adv on the back page of this issue.

paper is reporting the injury of Clarence Mager, it should have read Jate Mager.

Mrs. Henry Klepper received the sad news of the death of her son-in-law, Clifford Russel, husband of Hilda Klepper, who die at the home of his parents in Missouri. Burial was Tuesday in Missouri. Beside his wife he leaves to mourn, 5 children. Our sympathy is extended to her in her bereavement.

SCHOOL DAYS

AN ABBREVIATED STORY

BEAUTY AND EXPLORER

TRUESDALE ROVER, the famous explorer, traveler and hunter, never failed to dazzle and awe the young women who had the honor to be introduced to him at the social gatherings at which he was in such great demand. So now, sitting behind a potted palm with beautiful young Magazine Ootie at Mrs. Piggyback's reception, he prepared for an easy conquest as he launched into a description of the China sea snoutfish, which climbs aboard ships and bites sailors in half.

"Yes," she nodded brightly. "I've seen them. Aren't they exciting? But the sea oxen off the coast of Labrador are much more dangerous, because they hunt in flocks and butt holes into boats with their heads. Have you seen them?"

"Er—no," admitted Rover. "Now, the flying weasel of southern Zanzibar is a curious animal. It flies revolving with its tail in its mouth, for great distances, and yet never has been known to grow dizzy."

"Oh, yes, I've seen them often," replied Magazine brightly. "But I prefer to watch the Hellespont camels of central Hindustan. They walk backwards, you know, on their front legs, yet never bump into a thing, somehow. You've seen them, of course?"

"Well—er—no," said Rover, reluctantly. "I must tell you of the Bulgarian goulash bug, which sings like a mouth organ and drinks through a straw. When I first—"

"Oh, yes!" she interrupted. "I've watched them often. Have you ever seen the Patagonian plundog, which—"

"Stop!" cried Truesdale Rover hoarsely. "How on earth did you, at your age, get to see all of these things in all these places?"

"At the 'movies,' of course," replied Magazine, simply. "Shall we dance this one?"

But Rover had staggered off to phone in his resignation to the Geographical society.

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says she supposes she'll never be any taller if she lives to be a hundred years old as she understands a girl generally reaches the limit of her longevity at eighteen.

The United States government printing office, largest printing plant in the world, makes it own ink and other supplies at a great saving.

WHO WOULD HAVE GOLD?

By DOUGLAS MALLOCH

WHO would have gold? It isn't hard to gain: Go plant the seed, the Lord will send the rain And fill the fertile fields with yellow grain.

Who gold desires? Then sow the rolling hill, Or plant a little garden, if you will, Or put a box upon a window-sill.

And plant a bulb, or give a root a hold, And then some day observe a flow'r unfold.

It isn't hard to gain—who would have gold?

The summer sun will ripen all your wheat, A yellow rose will make your garden sweet, A yellow jonquil cheer your window-seat.

Upon your path the summer's petals fall, And autumn's yellow leaves adorn the wall.

Who would have gold? It isn't hard at all!

Mother's Cook Book

Die when I will, I want it said of me, by those who knew me best, that I always plucked a thistle and planted a flower where I thought a flower would grow.

CHEESE AS FOOD

CHEESE is one of our most valuable protein foods; is concentrated and has very little waste. When the price is high compare it with meat, one of the other proteins which we all like, and notice the difference in waste.

Cheese Omelet.

Beat two egg yolks until thick, add two tablespoonfuls of water, salt and pepper to taste. Beat the whites until stiff and add one cupful of grated cheese. Put a tablespoonful of butter in a hot, smooth frying pan; when hot pour in the lightly mixed omelet. Cook until well set, place in the oven to finish cooking on the top. Serve at once on a hot platter.

Welsh Rarebit.

Melt two tablespoonfuls of butter, add one cupful of grated cheese, when well blended add one cupful of hot milk; cook until smooth and creamy. Add one cupful of grated cheese and when the cheese is melted serve on buttered toast or hot crackers. To make the dish a little more tasty add half a dozen chopped olives.

Cheese Fondue.

Pour one cupful of scalded milk over one cupful of soft bread crumbs, add three-fourths of a cupful of soft cheese cut into bits, one tablespoonful of butter, and salt and pepper to taste. Beat five egg yolks until thick, add to the cheese mixture and fold in the stiffly beaten whites. Bake in a well-greased dish for twenty minutes or until puffy and cooked to the center.

Cheese and Celery Salad.

Select firm, crisp, tender celery and choose the stalks which have deep grooves. Cut into inch pieces and fill with seasoned cream cheese to which chopped onion, green pepper and nuts have been added. Heap a half dozen of these filled stalks on lettuce and serve with a French dressing.

This same method may be used for longer stalks and serve them as a salad accompaniment.

Hot Ham and Tomato Sandwiches.

Saute thin slices of lean ham very quickly in a frying pan. Peel and slice thin some ripe tomatoes. Have ready slices of white bread cut one-fourth inch thick and lightly toasted. Spread toast with salad dressing, cover with ham, then a slice of tomato and spread with salad dressing and chopped lettuce leaves. Cover with toast spread on one side with salad dressing. Cut into triangles and garnish with sliced pickle. Serve with coffee.

Baked Mackerel.

If salt soak over night, skin side up, changing the water several times. Put to bake skin-side down, adding a few teaspoonfuls of water. Cook 20 minutes, or until the fish loosens from the bones. After ten minutes cover with sweet cream and bake often during the baking. Serve with sauce poured over the fish.

How Land Is Used

The use of land in the United States for all purposes is as follows: Fourteen per cent crops for feed, 3 per cent humid improved pasture, 9 per cent humid unimproved pasture, 31 per cent arid and semi-arid pasture and grazing land, 12 per cent forest cut-over and burned-over land pasture, 13 per cent forest cut-over and burned-over land not pasture, 12 per cent roads, railroads, cities, farmsteads and other land not in pasture, 2 per cent crops for fiber, 4 per cent crops for food.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(© 1926, Western Newspaper Union.)

PERFORATING ULCER OF THE FOOT

PERFORATING ulcer of the foot is a strange affliction which occasionally occurs, especially in working people or those who are constantly on their feet. While it is sometimes found in some of the serious nerve diseases, such as locomotor ataxia, it is often found in patients in whom there is no sign of any nervous disorder.

It is usually found in men of about middle life, although occasionally cases have been found in young children. It is generally located at one of three spots in the foot where the pressure is heaviest, at the base of the great toe, under the little toe or under the heel.

Beginning with a local soreness or burning, the skin becomes red and tender, later breaking down to form an ulcer which stubbornly refuses to heal. Instead of spreading out on the surface of the foot like an ordinary ulcer, the perforating ulcer covers little space on the surface but keeps eating deeper and deeper into the foot, until it may go clear through the thickness of the foot itself.

In many cases, these strange ulcers are closely associated with some nerve injury. Any accident or injury in which the large nerve trunks of the limbs are injured or any general injury, such as burns or freezing of the foot or leg, may be the cause. Poisoning, such as alcoholic poisoning or any injury to the spinal cord or to the brain may be responsible.

The ulceration may be entirely in the skin and muscle or it may involve the bones and joints in the foot. If the bones become diseased naturally, the prospect is considerably less hopeful, as it is much more difficult to remove all the infected tissue and there is greater danger of the ulcer recurring.

While many methods of treatment have been tried, such as electric treatments, hot air treatments, etc., a complete cure can usually be secured only by surgical measures. Where there is no connection between the ulcer and the bones or joints, the ulcer will usually heal if all the diseased tissue is carefully cut out, the wound thoroughly cleaned and packed and the opening allowed to heal up from the bottom. If the ulcer involves the bones or joints, the diseased bone must be removed or at least as much of it as is affected.

Even with the most careful treatment, these ulcers are liable to recur. In some severe or neglected cases, where the whole foot has become infected, the only treatment possible is amputation of the foot.

BORROWING OXYGEN

MAN has been studying his own body for thousands of years and we don't know much more about it now than our ancestors did. How does it work and why does it work? We don't know except in a few instances.

Many theories have been advanced in trying to explain muscular action. We work our muscles in some way all the time. Even when sleeping and when the body is perfectly motionless, muscular movement goes on as long as life exists. Fortunately, life is not dependent on our conscious efforts. The heart, the lungs, the blood vessels, and most of our other vital organs go on working without any help from our minds, so far as we are aware.

For many years the opinion was held by physiologists that muscular action in any part of the body was due to "combustion." Not the kind of combustion we see in a cook stove or a furnace but the release of energy from the oxidizing or burning up of food substances in the muscles. From this oxidizing or burning up of the final products derived from our food was supposed to come the energy or power which makes it possible for the muscles to do their work.

While this view is still held by many, the most advanced authorities today regard the human body more as a chemical and less as a mechanical arrangement. As the Journal of the American Medical Association says, in a recent editorial, the muscle is no longer looked on as a combustion machine, but rather as a chemical engine in which motion of any kind is the result of chemical energy.

But perhaps the strangest and most surprising suggestion is that the muscles, when they need additional energy for work in the form of oxygen, can borrow this energy while the hard work is going on, and pay it back when the rest period comes.

According to Hill and Meyerhoff, the muscles accumulate energy in the form of food which has been digested and converted into a substance known as glycogen. When the muscle contracts, this is caused by the lactic acid in the muscle. This acid has to be changed back into glycogen by oxygen. Henderson and Haggard have shown that a man may use from 30 to 60 per cent more energy than he has oxygen for and afterwards pay up this debt by more oxygen during the rest period.

Father Now Cast for Untried Role

If the plans of a group of English clubwomen, some thousands strong, go through, father will spend his evenings beside the mending basket and the undarned sock. He will wash up the supper dishes, tidy up the parlor and scrub up the front steps.

Friend husband, in short, will do his share of the housework. He will sweep, dust, cook, wash and on Mother's evenings out (which will be more frequent than formerly) he will take care of the children.

Mother calls attention to the fact that she, too, has had a full day while father was at the office, and that any knickknacks or chores which happen to be left over when supper is done are to be shared henceforth on a 50-50 basis.

Detroit women agree that the 50-50 basis would be a fine adjustment, and many think that the boy should be trained for housekeeping as well as the girl. There is a long road to travel before this happens, however, according to Frank Cody, superintendent of Detroit schools.

Fathers and Mothers

Arthur Somers Roche, the novelist, was discussing at Palm Beach Rebecca West's recent diatribe on the selfishness of fathers.

"If fathers love their children too little," he said, "mothers love them too much. A mother is apt to love her child so extravagantly that she'll sacrifice anything for it—even her husband."

"One mother said to another: 'What a naughty little boy Tommy is! Doesn't he know better than to keep striking you over the head with that heavy stick?'"

"Don't blame him," said the second mother. "Don't blame the little angel. He's only doing, bless his heart, what he sees his father do every day."

Misjudged

The Marquis Henri de la Falaise, Gloria Swanson's husband, has opened a bookshop in New York. His popularity has increased in consequence. M. de la Falaise, discussing this increase in popularity, said the other day:

"When a titled foreigner marries an American girl with money the worst motives are imputed to him. It's like the little story."

"Sir," a young baron said to a Broadway banker, "I have called to ask if you will give assent to my marriage."

"Not a cent!" roared the banker. "Not a cent! Boy, show this young man out!" — Pittsburgh Chronicle-Telegraph.

Unan, Itch and Bury by hot baths of Cuticura Soap followed by gentle anointments of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each.—Advertisement.

Woman's "Second Leisure"

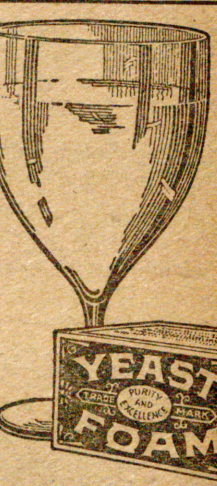

There comes a time in most women's lives when the children are grown that there is a let-down in life's responsibilities. That time I call the "second leisure." It is a blessing for such women to have an interest in something outside their home. It keeps them young. And their energies which have been heretofore employed in rearing a family, if they are harnessed, can be made of infinite use to the world and joy to themselves.—Congresswoman Kahn of California.

American Edibles

Tuckahoe is a name applied by the Algonquin Indians to many roundish roots. Specifically it included the golden club and the arrow arum, both having fleshy rootstocks, acid when fresh, but rendered edible by cooking and abounding in starch. Another highly prized tuckahoe is a subterranean fungus found in the southern states. It is not unlike a coconut. It is also known as Indian bread or Indian loaf.

Caucasians Lead

A recent survey of the world's population estimates the total at 1,849,500,000. Caucasians are estimated at 725,000,000; Mongolians, 680,000,000; negroes, 210,000,000; Semetic peoples, 100,000,000; Malays, 104,500,000; Red Indians, 30,000,000.

CHAPTER XII—Continued

Our conference was not leading us anywhere except into despondency, and I was relieved to witness a bustling activity down the creek, where a group of Natchez men seemed vitally interested in something. The group parted and I was gazing at the grandson of Strong Bow, the Huma chief. The young Huma carried a long calumet, which was decorated with the feathers of a white eagle, making it a pipe of peace. The word-bearer took the pipe from him and started with it toward the cabin of the Serpent. At that moment La Glorieuse came on the scene, barbaric and insolent, and with a glance read the situation. The Humas, allies of both the French and the Gulf Choctaws, were sending a peace pipe to the Natchez. The woman questioned the Huma rapidly; then swiftly ran after the aged word-bearer.

Both Labrador and I were considering the same questions: Where was Damoan? What pipe would Tattooed Serpent return?

The minutes passed and I wondered what part La Glorieuse was playing in the drama inside the war-chief's cabin. Suddenly I realized I was doing wrong to remain aloof when I knew her influence would be hostile to me and Labrador. With a few hurried words to my friends I rose and made for the Serpent's cabin. As I reached the door the word-bearer came out, importantly holding before him a Natchez white pipe. Behind him walked the woman, her dark face lively with triumph. I had hoped the Serpent would return a pipe ablaze with flaming feathers.

The Serpent from his couch cordially invited me to enter.

"You send peace to the Humas, who are nothing but red Choctaws, and the friends of the French," I said.

He stared at me thoughtfully, and after a minute calmly replied:

"I do not ask white men what pipes I shall send to red men. I was about to send back the flaming pipe. But La Glorieuse opened my eyes. Why send a war-pipe to men of my own color, who want only peace? It would be foolish. It is time enough to send them a red ax when they begin to help the French."

"Damoan the Fox sent the Huma with the pipe. Can my red brother tell me where the Fox is? He is my enemy."

"He is near," was the evasive answer. "I have told him he may come in safety. That was the talk I sent with the pipe."

"He is word-bearer for the Iron Hand," I reminded; and the Serpent had excellent cause to remember Blenville and his masterful ways and his law of "an eye for an eye."

"I do not fear the Iron Hand, because I do not fear death. And yet I tell the White Indian that this war against the French is not to my liking. My brother, the Great Sun, wishes it. I love my brother and must, as war-chief, take the path. But I do not like it. The Chickasaws promised the Great Sun much and made him see things in a dream. The man you call the Fox sends a strong talk through the white pipe. I shall have him tell it to the Great Sun tomorrow after the woman has been buried."

"And if his talk sounds good in the ears of the Great Sun there will be no war?"

"Then the war-sticks will be taken back from all our villages and from the Chickasaws."

"What if the Iron Hand demands my head?"

"He cannot have it."

"What if he asks that the woman be sent to Biloxi?"

"He cannot have her. She is your woman."

"Can Iron Hand have the man Labrador?"

"No!" It was explosive. Then almost gently, although there was no gentleness in his dark eyes: "His face will show no fear."

I interpreted his cryptic words to mean my friend would die as a part of the funeral ceremony.

I retired and walked slowly about the village, trying to straighten out my thoughts before rejoining my friends. English influence, working through the Chickasaws, had brought on the threat of war against the French. It would be most important news to carry East should the Natchez back away from their bargain. More insistent was the fact that Damoan with all his cunning would be free within twenty-four hours to walk around the village and ply his arts on the Great Sun.

Although I trusted implicitly the Serpent's assurances that the girl and I were safe I was most anxious to get away from the village before the Great Sun could be induced to recall the war-sticks from the Chickasaws. I depended upon the latter's friendship for the English to help me along

my journey to the English settlements, and their hatred for Blenville would surely prejudice them against my French friends, especially if he told them the Natchez refused to break away from their allegiance with the French.

In returning to my friends my attention was attracted to a medicine-man seated before his cabin. He was busy mixing vermilion as I paused to give him greeting. As the vermilion was not for war I knew it must be for the funeral ceremony.

"Who is to wear the new red?" I asked, after a respectful silence.

"It is to brighten the face of him who may be afraid to die. His face shall show no fear," he mumbled, bending low over his task as a hint he would talk no more with me.

The new paint was intended to cover any pallor in Labrador's dark countenance. It was a custom of the Natchez, this painting a victim's face, so that none could say a coward's death disgraced the noble dead.

The girl had fallen asleep in the warm sun. Labrador was staring at her most worshipfully. Without arousing her I hurriedly informed him of the new paint, whereat he made a grimace. I told him of the Natchez' strong inclination to take back their war-pipe from the Chickasaws and bury the ax they had promised to raise up against the French. In detail I spoke of escape and announced my preference for the overland trip from the Bluffs to Long Town. He readily agreed we did better to trust to the Chickasaws to stand between us and any pursuit, provided they were not enraged by the withdrawal of the Natchez to a point where they must shed white blood.

"The start must be tonight," he whispered. "Anything to save mademoiselle. Ah, that Fox! If I could only meet him when his Choctaws are not at his back! Well, the good God may send that happy day before this is finished. I have made my plan. I will go into the village as if to visit the Serpent, and pass on into the forest—and keep on traveling. I will leave my musket with you and take only my ax, knife and pistol. They will think I am coming back so long as you two are here. And they will never look for me to leave unless I go down the way we came. When it is dark you and mademoiselle take the

trail to Fort Rosalie, keep clear of the fort and make the river north of it. There you will find pirogues. You will also find me waiting for you if all goes well. Adieu!"

Without waiting to hear my opinion on his planning he laid aside his musket and strolled into the village. He had thought it out very wisely. The Natchez would not suspect Labrador of planning to escape in the daytime and without his gun.

CHAPTER XIII

Farewell to the River.

Labrador was waiting for us above Fort Rosalie, and we started on our long journey in a stolen pirogue. We saw nothing of Damoan and his men; and as the days passed I began to hope he had abandoned the pursuit.

So, with no-daily crisis to keep us alert, we three subsided and dwelt within ourselves. With danger left behind I had expected mademoiselle to become buoyant and more girlish. To the contrary she seemed to be more mature, more thoughtful. At

The Young Huma Carried a Long Calumet Which Was Decorated With the Feathers of a White Eagle, Making It a Pipe of Peace.

times I almost thought she regretted leaving New Orleans and her countrymen, that she already felt the chill of our more rugged northern clime and was perhaps interpreting it as a symbol of the welcome awaiting her beyond the Appalachians.

Her bearing was less surprising than Labrador's. He was preoccupied, often depressed, and seldom spoke unless one of us addressed him. Even answering the girl he latter had to tear his mind free from some gloomy obsession.

Instead of the excellent companions we had been to each other in the stress of danger we were three taciturn, solemn individuals, each wrapped in a blanket of introspection.

One night Labrador left our fire and walked to the river bank and stared out over the water. Mademoiselle timidly asked me:

"Those English? Will they look on me as a queer woman?"

"They will think you a most wonderful little woman."

"But alone with two men? And dressed like a savage?"

"They would think you mad to travel up this river without men to protect you, or if you wore the flimsy gowns of the old country."

"Yet they will not receive me as an equal?"

"We have some social distinctions," I admitted. "The landowner naturally lives on a different plane from the landless. Yet there is nothing to prevent the first from degenerating to the lowest plane, or the latter from climbing into the dignity of an estate."

Of course this was false, as there were certain types who never would be socially received, no matter how much worldly gear they might accumulate.

After a few minutes of silence she said:

"Monsieur, that other matter you mentioned as a way to help me. You understand how impossible that would be?"

"So long as you say so, it is most impossible. You should not trouble yourself by thinking of it."

"The river makes one forget. I always think of it stretching around the world. Last night I dreamed I was dead; that the three of us here were dead, and that we must forever work our way up this ferocious stream. I awoke, and for a bit believed we three were dead. I tried to remember just when we died, or were killed. Monsieur Labrador is no longer droll. He thinks of a woman. Of the Indian woman who died," she softly explained.

"Ridiculous!" I cried.

She lifted her head and stared at me, as a well-bred woman rebukes one guilty of an incivility. I was blundering around in the midst of apologies when Labrador returned to the fire. His forehead wore a frown. He did not seem to see us.

"Old friend, you are held by little devils," I said. "Of what are you thinking?"

"I was thinking of a woman, monsieur."

The girl glanced at me in haughty triumph. Labrador twisted his cap into smaller compass and sadly added:

"Of the Natchez woman. She was very fond of me."

He had no more to confide, and my respect for the girl's reasoning suddenly became exaggerated. It was the last explanation of Labrador's mood I would have arrived at. Once I knew it, however, there was nothing to be gained by meditating on it. But the girl's reference to my offer of marriage was an entirely different matter. That contained endless room for speculation.

The next day opened with rain. The storm blew down the river and was very disagreeable to face, as the rain blurred the vision. Yet I was determined to make the Bluffs that day, and once for all have done with the Mississippi.

When we landed at Chickasaw bluffs she gave voice to a fervent, "Thank God!"

"From now on it will be overland travel, mademoiselle," I told her. "You may find it hard at first, although the trail is good. We will go slowly until you are used to it."

"Go fast! Go fast!" she urged. "The farther we draw from the river—the miserable—the better I shall feel."

We gained the top of the bluffs, and I led the way into the Chickasaw trail. I explained to the girl

how we must follow it for more than a hundred and sixty miles to reach Long Town. Labrador, as if bidding farewell to the river forever, went to the brink of a bluff and stared gloomily at the leaden waters below.

I saw him lift his hands, as if in adieu, then leave the gesture unfinished and lean forward and peer intently down-stream. I called and after a bit of hesitation he turned and swaggered back to us. He smiled at the girl, and gave me a look that made me examine the flint in my gun.

"Forty-foot pirogue coming upstream. Filled with Indians. I think there is one white man in it," he told me in Choctaw, with a flash of his white teeth.

The girl was not to be deceived by his cheery manner, and fiercely demanded:

"What is it? Where are they?"

"There is a canoe down the river, heading this way. We don't know who is in it. There is nothing to fear. If mademoiselle will put her best foot forward for a few miles we will laugh at them. Remember, there is no danger. We shall be far up the trail before they can even land."

I meant this assurance only in part. Mademoiselle at her best could make but slow progress. Not used to forest travel and long confined to the pirogue she made me groan inwardly. She believed she was doing famously, and

I Raced Along at His Side and When He Tired He Passed Her to Me.

as the Choctaws would hunt us silently, not daring to proclaim their presence by their usual cries of discovery.

I expected any minute to behold them bounding from the bushes.

Labrador, too, was very uneasy and wished to drop back and guard the trail. I would not listen to his proposition, and muttering under his breath he suddenly caught the girl up and ran with her. She protested and struggled, but he paid no heed. She quickly quieted when she saw it was useless to resist. I raced along at his side and when he tired he passed her to me. And in this fashion we ran, taking turns in carrying her, and making excellent progress. I believed we were beyond all danger.

Our awakening came when the girl happened to glance back. She gave a shrill scream. Before she had finished Labrador had her behind a tree and I was under cover on the other side of the trail. I could see nothing to cause alarm.

"What was it, mademoiselle?" I asked, my voice betraying my impatience, I fear.

"A painted face close to the ground," she huskily replied, and pointing a trembling finger at a sycamore half way down our field of vision.

"You imagined it," I told her as she walked beside me up the trail with Labrador bringing up the rear.

"I tell you I saw it! A horrible face, with white and yellow stripes running up and down—"

With a low exclamation that was more a bark than any spoken word Labrador swept the girl from my side and darted with her into a clump of oaks. I did not pause to look back but followed him. A long arrow slithered against a tree within a few inches of my head as I joined my friends.

(TO BE CONTINUED.)

Little Need to Fear Bite of Brown Spider

Though spider bites may often be painful, especially to certain individuals, they do not justify the fear many persons exhibit for the eight-legged creatures, as most spiders are harmless; few of them are dangerously poisonous. All of the 400 or 500 species that a persistent seeker may find within easy reach of most American communities have poison glands, but none are so poisonous as they are reputed to be. Such poisons as they have are intended for defense against others in the spider's world of miniature life and for killing or rendering harmless the tiny creatures which supply her

diet. Man's organism is so great that it will not succumb to this dose of poison that suffices to kill an insect. The bites of a few species, nevertheless, do cause severe pain. The danger of their being inflicted, however, is offset to some extent by the color warning given to most of us by this class of arachnida. The more dangerous species display brilliant and sometimes very beautiful colors which at once attract attention; but of the ordinary little brown spiders we need have no fear.

Musical Trees

In Barbados there is a whistling tree. It has a peculiar shaped leaf and all its pods have a split edge. The wind passing through the pods cause them to emit the sounds that have given the tree its name. There is a long valley packed with these trees and when the trade winds blow across the island a continuous deep-tone whistle comes from the valley, the effect being extremely weird. In the Sudan there is a species of acacia known as the whistling tree.

When a Leaf Falls

I would like very much to find a word or sound which would bring to mind the fall of a leaf upon leaves. I know it perfectly—the generic timber—the composite echo etched into my mind by a thousand conscious listenings. But it will not get past my consciousness to my lips, and utterly refuses to descend my arm and pen.—William Beebe.

Fishing
FISHING from the banks of a sunny stream in springtime! Delightful. Fully comparable to catching, for the first time, the fragrant aroma of a cup of Monarch Coffee or Monarch Cocoa. High in quality — low in cost.

Card playing is being revived in Russia. The government card monopoly increased its output of playing cards in one month by 100 per cent.

Varnish and paint brushes can be kept soft by placing them in a jar of kerosene, the bureau of standards has found.

If you want to buy a car on time

It is to your advantage to buy the car that you can comfortably afford, on a payment plan that gives you a sure margin of safety.

General Motors has its own finance company, the General Motors Acceptance Corporation, operating the GMAC Plan. Through its service more than 1,000,000 families have purchased cars comfortably out of income.

On August 1 last, the price of this service, which had always been low, was further reduced. And the automobile-buying public is now saving millions of dollars annually as a result of this reduction and the influence of General Motors' leadership.

The purchase of automobiles on time is a universally accepted practice. The car is a utility and it is sound business to conserve capital and use credit. But buy on sound terms and at low rates. Any General Motors dealer will explain the advantages of the GMAC Plan.

Fifty Years of Telephone History

The first company organized to give telephone service was incorporated in 1879 by J. D. Paige, J. G. Elwood and H. W. Blood. This company obtained a license from the American Bell Telephone Company to use the Bell instruments and operate an exchange. At that time there was no general operating telephone system, but the company which owned the patents issued licenses to local people to operate exchanges in all parts of the country. At the time the work commenced in Joliet the promoters had the names of about thirty persons as promised subscribers and when the lines were put up and the switchboard put in operation March 1, 1880, there were about forty. In the same month a line was built to Lockport. The following November, another line was put up, extending from Joliet to Channahon and Bird's Bridge, and a year later this line was extended thru all the towns between Joliet and Ottawa. This line did not belong to Paige and Elwood, but was erected by the company operating boats on the Illinois and Michigan Canal. It was operated, however, by the Joliet exchange. On December 1, 1881, Paige and Elwood retired and business was taken over by the Chicago Telephone Company, which had just been organized to do a general telephone business in Chicago and tributary territory.

In 1882 work began on the erection of a line along the tow path of the Illinois and Michigan Canal between Joliet and Chicago, and on September 18, of that year the line was opened for public use. It worked well, and from that time on Joliet has enjoyed ample telephone connection with Chicago and the rest of the United States and Canada.

In 1901 a second telephone system was established in Joliet, and for eighteen years there was telephone competition here. This competition was more or less thruout the country, but it had not been long in effect until the people began to realize that it was undesirable. The duplicating systems in Joliet and other northern Illinois cities covered by the same organization were taken over in 1919 by the Chicago Telephone Company and the single system was restored. This met with general approval and it is doubtful if any one to-day would advocate a return to telephone competition.

For a number of years Joliet has been connected with Chicago by a toll cable, the first of that length cable constructed by our company. It follows the route of the Illinois-Michigan Canal from Willow Springs into Joliet. Last year the world's longest telephone cable, connecting Chicago with New York, was opened for service. Our company and the American Telephone and Telegraph Company are now constructing a toll cable system which will connect Chicago with St. Louis, passing thru Joliet, Peoria and Springfield. The section from Peoria to St. Louis, thru Springfield, is already completed, and as just stated, the cable from Chicago to Joliet has been in service for some time. Work is now in progress on the remaining link between Joliet and Peoria, and this will be completed so that the entire cable line may be opened before the end of this year. This will give Joliet and other cities along this line continuous connection by cable with Chicago and the Atlantic seaboard, as well as St. Louis, and the Illinois cities on the southern section of the system. Telephone cables are subject to a minimum of interruption by storms. These enterprises are in furtherance of the policy of the Bell System to make telephone toll service as dependable as possible.

The successful operation of these cable lines has been made possible by several notable inventions, including the repeating coil and the vacuum tube repeater. In an address before the engineering society in Chicago a few days ago, the Chief engineer of the long lines Division of the Bell System stated that if all the electric power generated in this country were to be thrown into the New York end of the toll cable, the resistance of the cable would be such that no power would reach the Chicago end. This gives a hint of the difficulties which had to be overcome in making a workable cable of such length. It was accomplished by the introduction of a booster, or repeater, stations at a number of points along

the way. It is not too much to predict that within a few years similar cable systems will have been extended to connect up all important cities in America and from that time on, you will hear very little about the isolation of one part of the country from another on account of storms.

Fifty years ago the American people had no inkling of the wonderful things which have come to pass in the half century of our national existence just closing, but now they look upon the marvels of science as commonplace things. By the same token, it would be idle for us to attempt to predict what will come in the next fifty years. The world is undoubtedly entering a new period of marvelous advance in scientific achievement. In this forward march we believe that the telephone system will continue in the front rank, extending, developing and perfecting its service to keep pace with the growth of the country and the demands of civilization.

MOKENA

The society column of the Sunday Chicago Tribune had a big surprise item last Sunday morning by way of the announcement of the marriage of Miss Florence Koeller daughter of Mr. and Mrs. George Koeller of Mokena and Joseph Gee, son of Mr. and Mrs. George Gee, Sr., of Orland. The wedding was a very quiet affair and took place in Chicago on May 8th. Mr. and Mrs. Gee are making their home for the present with Mr. Gee's parents.

The opening dance given by the Mokena Men's Club last Saturday night at the Cappel Grove was a whale of a success over 250 dance tickets being sold. The next dance will be held on May 29.

A number of Mokena people have bought tickets for the banquet to be held by the Southwest Towns Chamber of Commerce at the Southmoor Country Club near Palos Park on Tuesday evening May 25.

Grandma Barenz who has been critically ill with pneumonia is somewhat improved.

The Don C. Hall Medicine Co., opened their summer shows this week, opening at Wilton Center on Monday night.

Mrs. Bears died 75 years, mother of Mrs. Julius Hirsch died at her home in Blue Island Monday. Funeral services were held Wednesday afternoon.

Mr. and Mrs. Wm. C. Schmuhl entertained the following guests

at dinner Sunday: Mr. and Mrs. J. C. Brisbane, Mr. and Mrs. Kit zerow, of New Lenox, Mr. and Mrs. C. F. Schmuhl, Mr. and Mrs. Hy Schmuhl of Joliet and Mrs. Ralph of Jackson.

Fifty members of the St. John Evangelical church recently delight fully surprised the former pastor, Rev. Wm. Kreis when they attended services at his church in Dalton in a body. The visitors had brought a bountiful dinner with them which was served in the parlors of the church.

Rev. and Mrs. W. J. Cramer were Chicago visitors Tuesday.

Fred Hentsch has returned from a trip to St. Louis.

Edward Baimey who has been staying at the George F. Wannemacher home has gone to Alabama where he is employed as a cook in a restaurant.

Hugo Niethammer of St. Louis has been visiting with his father and sister the past week.

Emil Borges has been doing the painting work of the new A. & P. Store at Tinley Park the past week.

Mrs. Walter Fisher assisted by her brother Isadore Lewis of Joliet is continuing the administrators sale of the store stock of the late Walter Fisher.

Mrs. Fiedler who has been spending the winter here at the home of her daughter, Mrs. A. E. Wachter, expects to return to her home in Grand Rapids, Mich.

The Mokena baseball team defeated the Marley nine at the Shiek diamond Sunday 13 to 3. Mokena is to play Frankfort at Mokena on next Sunday afternoon.

ORLAND

Orland is going to be in the center of much golf activity from the present indications. The past week C. F. Habenicht sold his 145 acre farm east of Orland to the Dixmoor Golf Club for \$350 an acre. Chas. Stortz is also reported to have sold his farm to the same club.

Rev. W. C. Greve attended the funeral of his uncle, August Franke in Chicago Tuesday.

John Habenicht has been the official village cleanup man the past week hauling away the rubbish.

Mr. and Mrs. George Gee, Sr., entertained Sunday their sons and wives, namely: Mr. and Mrs. Geo. E. Gee, Mr. and Mrs. Edward Gee and daughter Ruth of Chicago and Mr. and Mrs. Joseph Gee.

CHRIST LUTH. CHURCH Pentecost services in German at 10 a. m. Sunday May 30 with the communion.

ORLAND M. E. CHURCH

Friday, May 21—The famous Paramount picture de luxe "North of 36". You will see 4500 cattle cross thousands of miles of dangerous unblazed trail, brave men crossing turbulent rivers, fighting fierce stampedes and resisting furious Indian attacks. Jack Holt and Lois Wilson are the stars.

Saturday May 22nd. The regular choir practice at 8 P.M. new time. Our choir is doing excellent work, but there are still vacancies that should be filled.

Sunday May 23rd. Bible school at 9:30 Standard time. Morning worship at 10:30. The sermon: "Prayer as a Dominant Desire." Evening service at 7:30 Standard time. An unusual screen production featuring Mary Astor and Herbert Blache, entitled "The Beggar Maid." It is produced by Mr. Isaac Wolper who became famous in producing "The Miracle Man." In addition to this screen production the pastor will speak on the theme of "Love and its function in Life." You are invited.

On Tuesday May 25th the fourth session of the Southwest Towns' Training School will meet at Worth Supper served at 6:30 New time. Supper reservations must be booked in advance.

On Memorial Sunday May 30th there will be a special Memorial Day Patriotic Service in the morning with appropriate music and sermon. In the evening there will be a dramatic reading given by Miss Stella Haehnlein, also special music and a moving picture commemorating the Washington Disarmament Conference.

The pastor and family were dinner and supper guests Sunday at the Frank Sayers home. In the afternoon they visited "Shut-ins."

Mr. Robert Murdock has moved from Chicago and is making his home with Mr. and Mrs. Clarence Beagley. Mr. Murdock is assisting with the music of the Methodist church.

Mr. and Mrs. George Gee, Sr., entertained Sunday, their sons and wives namely: Mr. and Mrs. Geo. E. Gee, Mr. and Mrs. Edw. Gee and daughter Ruth of Chicago and Mr. and Mrs. Joseph Gee.

JOKES— Richard Coulter
WEATHER— Jack Van Treese
RECEIPE— Margaret Lambright
RADIO— Ruth Winther
CONTINUED STORY— Raymond Stevens
ADVERTISEMENT— Frederick Ingersoll

Evelyn Whitehead is going to Colorado Springs, June 27th for her vacation. Evelyn went to the Englewood show and saw John Salem. It was a good show.

Kenneth Khuans has new tennis shoes.

Fred Cleveland and Alonzo Corder went to Hickory Hill to caddy last Saturday and Sunday.

Kenneth Khuans has a new bow and arrow. The arrows are red with red and green feathers.

The festival will be June 4th in Palos Park.

The first, second, third and fourth are going to have an opera the last of school. Come.

Mrs. Geo. Hoffman has a baby boy.

The Oak Lawn Midgets will play Ellsworth and George Voss' team Tuesday after school. Earl Weidner will pitch.

Mrs. Hablas was ill Saturday.

Gladys Olson went to New Orleans Sunday to stay for two weeks.

The Girl Reserves went on a hike to Dynell Springs. They returned on the bus. We all rode on

the ponies and had a nice time.

Edwin Schmalen went fishing Saturday and Sunday and got 25 fish.

Over at the ball game Sunday Verna Johnson was hit with a foul ball and is badly hurt.

The Oak Lawn Northsiders played the Southsiders recently with a score of 18 to 13 in favor of the later.

Last Friday there was a ball game. Oak Lawn won. The girls gave some yells led by Fred Cleveland. The score was 9 to 1.

Second and third rows are ahead in keeping their hair neat for two weeks. They have 2 blue stars and one red star.

On Friday May 13th, Mr. Rees' club went to the University to look at the stars thru the telescope.

Mr. and Mrs. C.J. Peters returned from California last Tuesday.

Evelyn Whitehead's grandmother is visiting at her home.

First and fifth rows have two blue stars and one red star in the shoe shine for 2 weeks.

OAK LAWN

Mr. and Mrs. Erich Schliephake (candidate in the last local election in Oak Lawn) have moved to their new home at 52nd avenue and 93rd St., Mr. Schliephake purchased this beautiful home from Mr. and Mrs. A.V. Ivy of Oak Lawn.

FRANKFORT

A son was born to Mr. and Mrs. Fred Bettenhausen last week. Mrs. Bettenhausen will be remembered as Miss Sadie Subert.

Henry Elsner had his Hudson Sedan smashed while in Chicago last Friday when he ran into a large truck. His car was damaged badly. He has a new car now.

The condition of Mrs. Peter Pfeifer has not been so well the last few days.

Mrs. Linhom and daughter, Mrs. Lena Weishaar of Chicago Heights, visited Sunday with Mrs. Peter Pfeifer.

Mrs. Chas. Elsner received the sad news of the death of her youngest sister, Mrs. Emma Long of Joliet last Wednesday. The funeral was held at Joliet on Friday afternoon with burial at Elmhurst.

Chas. Pfaff, Sr., moved into the Schroeder house last Tuesday. He recently purchased this place.

The seventh grade entertained the eighth grade graduates at a party at the school last Friday evening. Games were played after which refreshments were served. Twenty three guests were present. Sandwiches, pickles, cake ice cream fruit and coffee were served. A token of remembrance was given to each guest present.

August Knater who has been ill with pneumonia is much improved. The nurse who has been in attendance returned to Joliet Saturday.

The Industrial Club will give a dance next Saturday at the grove.

Quite a number of school children have been ill with what is supposed to be rash which only lasted a day.

Mrs. Frank Pfeifer who has been caring for her mother in law, returned to her home in Chicago Heights last Saturday after being here for two weeks.

Miss Leona Stauffenberg of Manteno will be our next teacher in the primary room for the next term.

The following will graduate at the Frankfort public school: Evelyn Hossbach, Dorothy Shroth, Burton Breidert, Harold Cheney, Chester Pfaff and Vernon Fink.

Rev. G. S. Gerhold of Champaign who has been chosen as the new pastor of the St. Peter Evangelical church has been spending a few days here the past week putting in his garden at the parsonage. Rev. Mr. Gerhold expects to move here in June.

Next Sunday the services at the St. Peter's church will be held at 8:30 in German with communion and at 10:30 English services with communion. Sunday school at 9:30. Next Sunday will be Pentecost services.

Miss Mary Bauch who has been and at 10:30 English services with the same.

MOKENA

Mr. Fred Hentsch spent a few days last week in the southern part of the state.

The Deadmore and Semmler families spent Sunday at Ritchie, Ill., visiting with Mr. and Mrs. L. Graybeal. While there they went thru the private museum of the late Thomas Diven, a former Chicago lawyer, scholar and writer. The museum contains very valuable articles gathered by Mr. Diven from many countries as well as from our own country. It is very interesting.

Mrs. John Frisch is ill in St. Joseph hospital in Joliet.

The condition of Grandma Barenz is about the same.

Miss Mildred Butler entertained Bugab, Louis and Fern Ferris from Dequoin, Ill., and Mrs. McGuffin and two sons, Wm., and De Vere from Joliet, Sunday afternoon.

A number cases of measles are reported.

Mr. and Mrs. J. Homerding and daughter spent Thursday in Chicago. Mrs. Charlotte Becker moved from Mokena this week and has gone to Frankfort to live with her brother, Mr. Fred Marti. Mrs. Becker's friends regret to see her leave but wish her much joy in her new home.

The Parent-Teachers Association will give their banquet in the St. John church basement.

St. John Evangelical Church
W.J. Cramer, Minister

Sunday School at 9:30. English service at 10:30. Holy Communion in connection with this service. Evening service at 7:45. Brotherhood meeting Monday evening. Tuesday evening young people's play rehearsal. Wednesday evening orchestra rehearsal.

Thursday evening Church council meeting. Friday evening play rehearsal. May 30th, Evangelical Day at Chicago Heights. All members and friends are cordially invited. No services in the local church on May 30th.

Young People Play, "The Old District School" will be given in the church basement on Thursday June 25th.

Mokena M. E. Church Notes
Gen T. Beaty, Pastor.

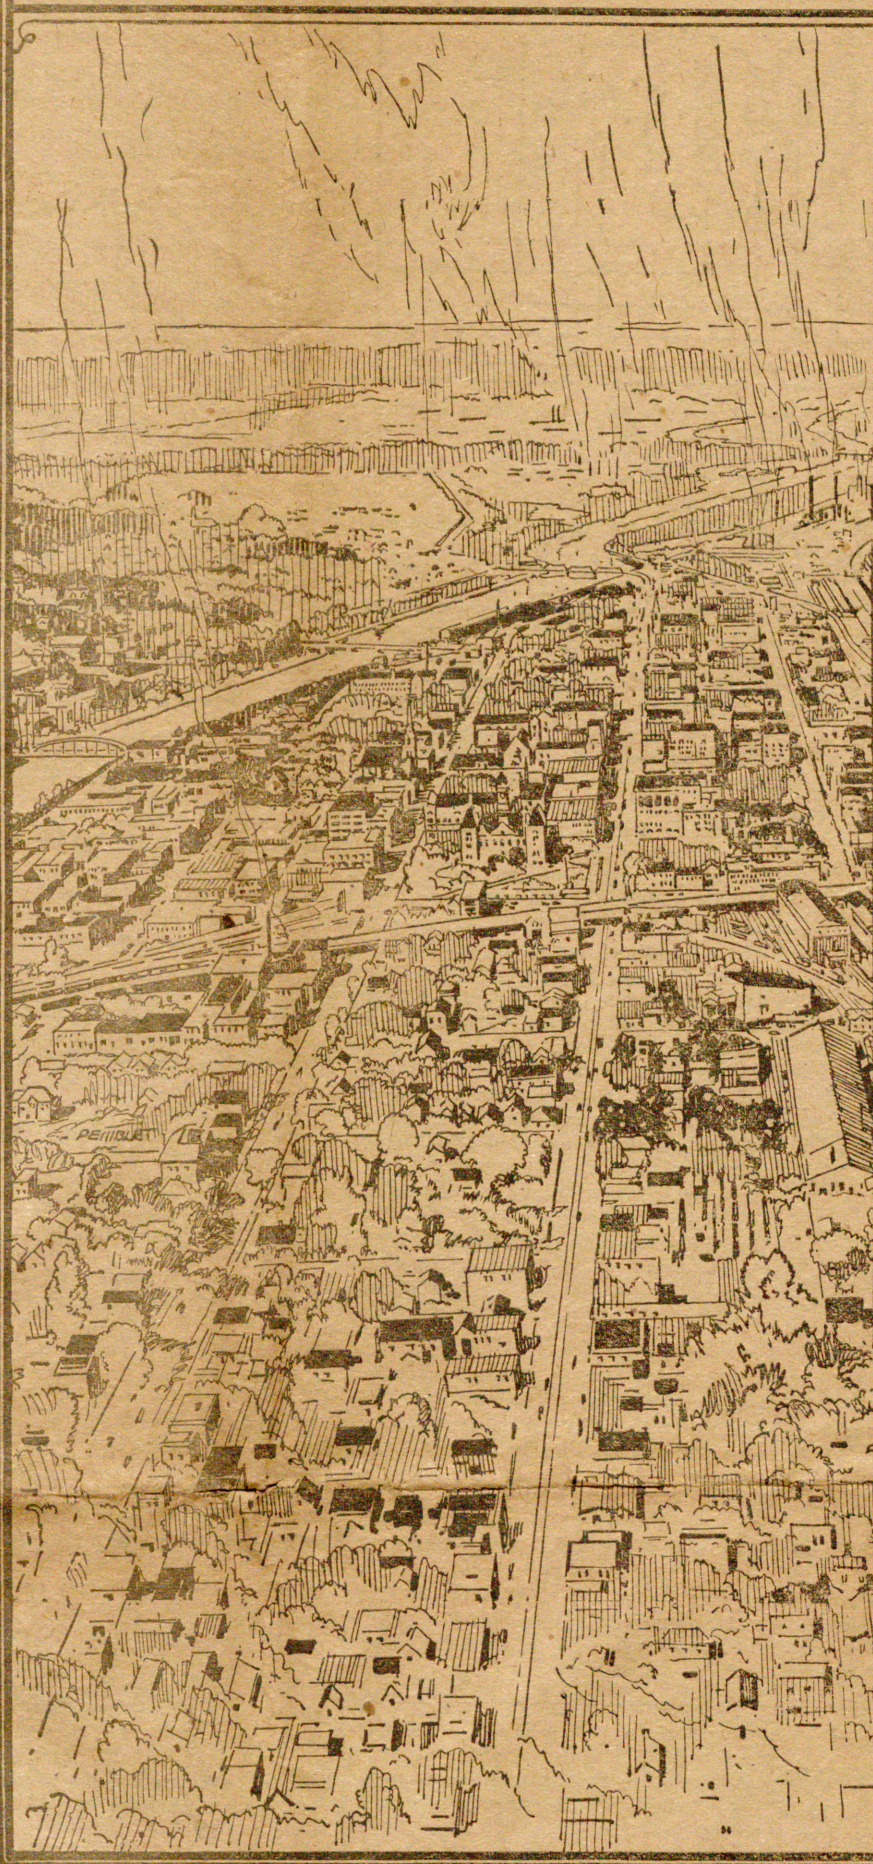

Church School at 10:30 A.M. Intermediate League 6:30 P.M. Evening worship at 7:30 P.M. Sermon "The Leaven of the World"

We have the privilege to announce as new preparatory members, Mrs. Florence Mahoney and son Clifford. We are glad to note the additions to the various churches of our village; let us all get in line and make our churches the great centers of our community spirit. Our churches are open to all that love Christ, and we invite you.

Mr. Beaty has been granted a few days vacation in June by the Official Board. He will not hold services June 13th. He will be back for the evening service June 20th.

Mr. and Mrs. W. E. Houchin and Miss L. A. Justus of Chicago visited with Mrs. John Semmler Sunday.

Serving another city with a population of 150,000

YEAR after year the facilities of this Company are being increased so that modern conveniences of gas and electricity may be made available to a greater number of people.

During 1925, for example, 33,129 new customers were added to the lines and mains of the Company. This increase in customers—the largest in the history of the Company—is equivalent to the number of customers served in a city of 150,000 inhabitants.

In 1925, also, the gross operating revenue of the Company was 14.7 per cent more than the previous year and after payment of charges there remained applicable to dividends \$4,146,549, an increase of 29.3 per cent over the previous year.

Write for the latest Year Book and read the interesting story of this Company's progress.

LIVES ON FARM IN OKLAHOMA

Happy Woman Praises Lydia E. Pinkham's Vegetable Compound

In a sunny pasture in Oklahoma, a herd of sleek cows was grazing. They made a pretty picture. But the thin woman in the blue checked apron sighed as she looked at them. She was tired of cows, tired of her tedious work in the dairy. She was tired of cooking for a household of boarders, besides caring for her own family. The burdens of life seemed too heavy for her failing health. She had lost confidence in herself.

One day she began taking Lydia E. Pinkham's Vegetable Compound and her general health began to improve. She took it faithfully. Now she can do her work without any trouble, sleeps well and is no longer blue and timid. This woman, Mrs. Cora Short, R. R. 9, Box 336, Oklahoma City, Okla., writes: "Everybody now says: 'Mrs. Short, what are you doing to yourself?' I weigh 135 and my weight before I took it was 115. I have taken seven bottles of the Vegetable Compound."

Other women who have to work hard and keep things going may find the road to better health as Mrs. Short did, through the faithful use of Lydia E. Pinkham's Vegetable Compound.

Ask your neighbor.

Mystery Messages
We often hear the saying that there is nothing new under the sun. Those who look upon wireless as the greatest invention of our time do not realize that for hundreds of thousands of years it has been practiced by the wild inhabitants of the countryside. Those who spend their lives in the fields cannot fail to have seen many incidents which prove that mammals, birds and insects are able to communicate to one another over long distances.

Quality
"Last night I made an awful mistake."
"That so? How?"
"I drank two bottles of gold paint."
"How do you feel?"
"Gully."

Tired, Lame, Achy?

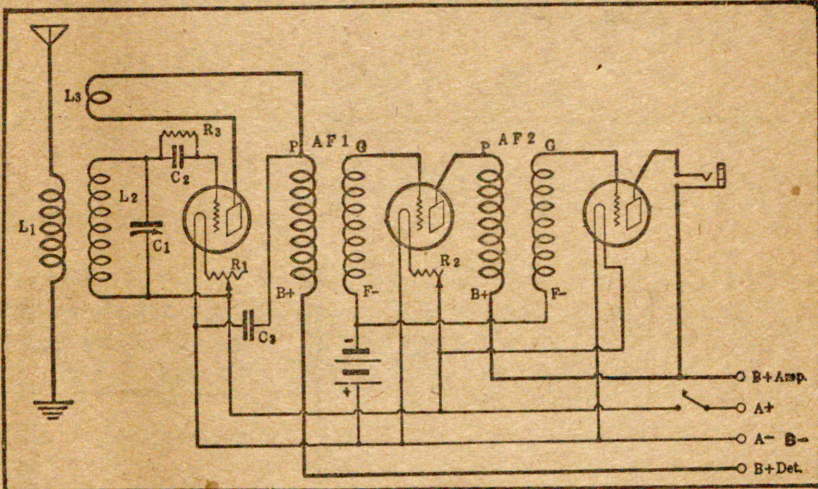

Are you dragging around with a constant backache? Feel weak, worn and achy; so miserable you can't enjoy a moment's comfort? How about your kidneys? Well kidneys filter off body poisons. But when the kidneys slow up, poisons accumulate and upset the system. Backache is apt to follow, with sharp pains, dizziness and annoying kidney irregularities. Don't delay! If you suspect faulty kidney action, use Doan's Pills. Doan's have helped thousands—are recommended the world over. Ask your neighbor!

An Illinois Case
Mrs. H. C. Bollinger, First St., St. Louis, Mo., Ill., says: "Dull, bearing-down pains in my back dragged me down. Sharp twinges used to seize me when I stooped and it was hard to straighten. I also had headaches and dizzy spells made me feel miserable. My kidneys didn't act normally. I used Doan's Pills and they stopped the backache and other symptoms of kidney trouble."

RADIO

The Circuit Diagram of the Three-Tube Set That Was Completed Within One Hour.

By CHESTER CHARLTON
In Radio World.

The one-hour set is not one that simply lasts an hour, but one that it takes only one hour to make. It will last for many years and will render excellent service.

The radio side of the circuit consists of the justly famous three-circuit tuner. The audio channel comprises two stages of transformer coupled amplification. Hence the three tubes. All three sockets are a part of the detector-amplifier unit. Only the radio side need be wired. The only change I made was to cut the one-inch lead that comes from the F posts of the two audio transformers to insert a "C" battery (as shown in diagram).

Coil Information.

Any of the commercial three-circuit tuning coils may be used in this circuit. The one shown tunes with a .0005 mfd. variable condenser. It has a pancake tickler. However, some other sort of tickler will do as well. For instance, if you wind your own coil, you may use a 3 1/4-inch diameter tubing for the stator, 4 inches high, placing 10 turns of No. 24 double silk-covered wire near the top (L1). Terminate. Leave 3/4-inch space and wind 45 turns of wire in the same direction for the secondary (L2). The tickler would consist of as many turns of the same kind of wire as you can put on any tubing that will rotate inside the secondary. Remember that a shaft has to pass through the secondary, hence wind the tickler coil so as to leave anchorage room thereon for the shaft where it must be joined to the tickler form.

A straightline capacity tuning condenser was used. This has semi-circular plates. The fact that the condenser has an insulation end-plate does not mean that the condenser is not low-loss. It is. To make the tuning more

convenient on the lower waves, and yet avoid crowding on any part of the dial, a converted dial was used.

The Parts Needed.

You need get only a 7 by 18-inch panel, a .0005 mfd. variable condenser, a dial vernier, if you use frequency condensers, or a converter, a 7 by 17-inch baseboard, a grid leak, and a knob.

The layout of the parts is very simple. As the condenser is the only real tuning element, it alone has a dial. The tickler coil is turned by means of a knob, even a rheostat knob, or, if desirable, a 2-inch dial may be used here. The rheostats, jack, and even the fixed condensers, including the grid condenser, are part of the detector-amplifier unit.

The wiring precautions include these: Connect the rotor plates of the variable condenser to the grid return side of the coil L2, the 45-turn coil, if you make your own. This is the connection made to "A" plus. Connect the aerial coil so that the ground and "A" plus connections adjoin. This accounts for two terminals, one each of primary and secondary, and the other connections of these windings go to aerial and grid condenser, respectively. The tickler or movable coil may be joined to the plate of the detector tube in either manner, that is, either terminal to plate.

Actual Time, 57 Minutes.

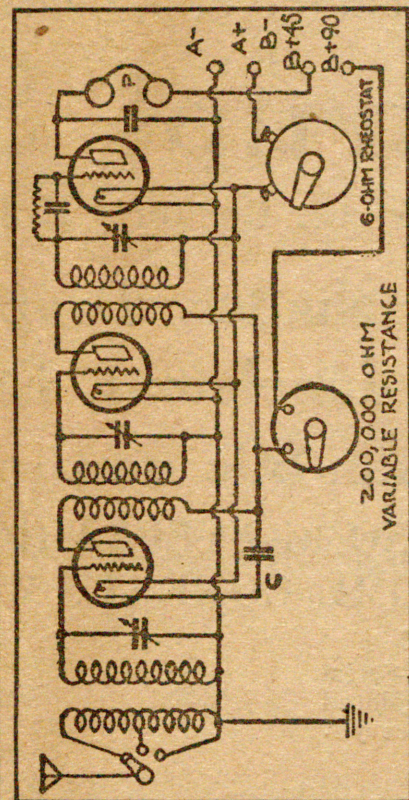

The set shown in the photographs was completed in 57 minutes, but we will call it an hour. This included the drilling of the panel and the mounting of the dial, two items that require a little care and hence took a good fraction of the time. There are only about a dozen connections to make. The leads are brought out to binding posts on the unit, and a marked battery cable should be used for convenience in establishing contacts at the batteries.

Standard Type of Tuned Radio-Frequency Outfit

The growing tendency to use high voltages in audio frequency amplifiers often results in the application of the same voltages to the radio frequency tubes, due to the fact that separate binding posts for the radio frequency and audio frequency "B" positive taps are not provided for in many sets.

The accompanying illustration shows a convenient and practical method of varying the voltage on the radio-frequency tubes, by the use of a high resistance.

The circuit shown is not new, but is a standard type of tuned radio-frequency outfit, illustrated to show where the high resistance should be

Method of Varying Voltage on Radio-Frequency Tubes.

connected in such a set. The same idea is applicable to intermediate stages of a superheterodyne or to other forms of radio-frequency amplification.

Where the amplification voltage is between 90 and 135 the resistance may be 200,000 ohms maximum, although much lower values usually will give the desired results. The principal point to be considered in choosing such a resistance is its ability to go down to fairly low values of resistance.

Note that the variable resistance is

Sunday School 'Lesson'

(By REV. P. B. FITZWATER, D.D., Dean of the Evening School, Moody Bible Institute of Chicago.)
(© 1929, Western Newspaper Union.)

Lesson for May 23

ISAAC AND HIS WELLS

LESSON TEXT—Genesis 26:12-25.
GOLDEN TEXT—A soft answer turneth away wrath, but grievous words stir up anger.—Prov. 15:1.
PRIMARY TOPIC—Isaac Refuses to Quarrel.

JUNIOR TOPIC—Isaac Refuses to Quarrel.
INTERMEDIATE AND SENIOR TOPIC—Isaac the Peacemaker.
YOUNG PEOPLE AND ADULT TOPIC—How to Deal With Aggressors.

Isaac was a child of the covenant and given in the time of the old age of Abraham and Sarah in fulfillment of God's promise (Gen. 15:1-5). His name means laughter, a reminder of the gladness of the heart of his mother when she learned that she was to have a son. As to character he was gentle, meek, meditative and peace loving. He was a remarkable contrast to his father Abraham. Two things may have affected him to his disadvantage.

1. The shadow of his illustrious father.

Sons of great and rich men commonly do not make much of life. The necessity of struggle is not forced upon them.

2. He was brought up as the only child of his mother.

The tendency in such a case would be to shield him from the necessity of self-effort so that he would be unable to meet life's stern realities. Every child should be compelled to think for himself and to fight his own battles. While not a mighty man by nature's gifts, through the blessings of God's grace he became the inheritor of the covenant promise. He was not only a meek man, but a man of prayer as well (Gen. 24:63; 25:21; 26:23-25).

1. Isaac in Gerar (vv. 12-17).

1. The Lord appeared unto him (vv. 1-4).
Because of famine in the land Isaac went into the country of the Philistines. This distress should have moved him to call upon the Lord (Jas. 5:13). It was better to suffer in the land than to go among the enemies of God's people. The Lord graciously appeared to him there and directed him not to go into Egypt, thus avoiding the error of his father.

2. His lapse (vv. 7-11).
He fell into the same temptation as Abraham many years before (Gen. 20:13). When one goes into the enemy's country he can expect to be tempted to do wrong.

3. His prosperity (vv. 12-17).

Isaac did not intend to make Gerar his permanent place of abode. He intended only to sojourn there. While there he sowed and reaped bountifully. This prosperity was no proof that God approved of his course.

11. Isaac's Enemies (vv. 18-22).

Isaac was not permitted long to enjoy this fruitful land. His prosperity incited the envy of the Philistines. Success in any calling in life will provoke envy. Ministers and Sunday school teachers sometimes become envious of each other. The Philistines ordered Isaac to leave them. Wherever envy has begun its deadly work there must be separation. They took as the method of getting rid of him the stopping up of the wells. Isaac did not contend with them but peaceably withdrew to another place where he proceeded again to dig the wells of his father. The Philistines again strove with him. He named this place Esau, which means contention, and again he removed from them.

The second name he gave was Sitnah, which means enmity. This willingness to remove from the enemy shows his willingness to be imposed upon rather than to fight. The third time he dug wells there was no strife. The name given to this was Rehoboth, which means room. We should learn from his behavior that the way to have peace is to wear out our enemies with patience.

11. Isaac in Beersheba (vv. 23-33).

Immediately upon Isaac's going up from among the Philistines the Lord appeared to him. The Lord permits envy and strife in the world in order to get his children separated from them. Following this visitation by the Lord, Isaac built an altar and called upon His name. As soon as a meeting place with Jehovah was established he pitched his tent there. Following this his servants dug a well. No use going among the Philistines to get water.

After Isaac was established in Beersheba, Abimelech came desiring to make an alliance with him. He gained influence by peaceably withdrawing from them. Being thus convinced they desired to enter into covenant relationship with him. The way to gain influence with the world is to withdraw from it.

Noblest of All Victories

For a man to conquer himself is the first and noblest of all victories; whereas to be vanquished by himself is the basest and most shameful of all things.

Believing in Truth

Trying to have the courage of other people's convictions is a difficult task. One must really believe in a truth himself before he is willing to suffer for it.

The Gospel of Christ

By REV. F. T. CONNER
Extension Department, Moody Bible Institute, Chicago.

TEXT—I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth.

In a day when greatness was measured by wealth and strength and standing armies Paul wrote to the Christians at Rome: "I am not ashamed of the gospel of Christ; for it is the power of God unto salvation to every one that believeth."

There are four things mentioned here: "The gospel of Christ," "the power of God," "salvation," and "believeth." In the face of all the facts of Roman decay and decline, Paul declared the gospel of Christ to be the panacea for her ills. Rome had wealth, learning, and standing armies, but these could not keep her from the paralysis which sin was working into her innermost life. The great restorative for any declining civilization is the gospel, if only it is applied.

What is the gospel of Christ? First, "Christ died for our sins, according to the Scriptures." That is the foundation fact of the gospel. The Old Testament economy looked forward to the "Lamb of God that taketh away the sin of the world" (John 1:29), and Christ constantly set forth His death as an essential in God's plan for saving men from the thralldom of sin. His life was beautiful, rare, but in no sense was it vicarious; only on the cross was He a sin-bearer. "Who his own self bare our sins in his own body on the tree" (II Peter 2:24). He bore them in his own glorious divine personality.

When God the mighty maker died, For man the creature's sin Well might the sun in darkness hide And shut his glories in.

It was God who laid our sins on Him in that hour of great extremity when he cried, "My God, why hast thou forsaken me?" "All we like sheep have gone astray; we have turned every one to his own way and the Lord hath laid on him the iniquity of us all" (Isa. 53:6). The sinless one took the sinner's place. "He who knew no sin was made sin for us that we might be made the righteousness of God in Him" (II Cor. 5:21). That is distinctly the first fact of the gospel of Christ. There is nothing like it in all the man-made religions in all the world.

Second, "and was buried," following as a sequel of His death. But the tomb cannot hold Him. "He arose again the third day, according to the Scriptures." A dead Christ is of no value to a believer. Here the Christian religion is differentiated from all the religions of the world. "He is not here, He is risen."

This crucified and risen Christ is the power of God, the great dynamic whereby God saves the believer from sin and death. Christ gave His life for the believer. "No man taketh it from me. I have power to lay it down and have power to take it up again." "He showed Himself alive after his passion by many infallible proofs."

Third, the gospel of Christ "is the power of God unto salvation." Salvation is the big word of the Scriptures, not greater than the term of deity, but the all-inclusive word embracing all that God did through Christ for us. The sum total of God's work in our behalf is in the word salvation. Salvation can be defined as deliverance from the penalty, pollution and power of sin. All is accomplished in the death and resurrection of Jesus Christ.

Lastly, "to every one that believeth." The sealing virtue is faith. "Through this man is preached unto you the forgiveness of sins; and by Him all that believe are justified from all things, from which ye could not be justified by the law of Moses" (Acts 13:39). In these days of denial we need anew to reinforce the basic belief has in the Christian scheme. This gospel of Christ, "the power of God unto salvation," is secured only "to every one that believeth." That is God's final touch-stone so simple, yet so sublime.

Peace

Peace is not a compromise with circumstances. It does not come out of an interloction which runs after this fashion: "Let me alone; if you will be quiet, I will be quiet; let us proclaim a truce." Rest is not a compromise—it is a Divine reality in the heart. Righteousness is rest, holiness is peace; rectitude with God, coming through trust in the atonement of God the Son, means tranquility deep and unchanging as the peace of God which passeth understanding.—Doctor Parker.

Real Remedy for Doubt

What then is the true method? It is the method of practical experiment. Making actual experiment of the Christian life, one soon finds the experiment working out. Instead of seeking to know that he may do, he does that he may know, and the word of Christ is fulfilled—he that willeth to do the will of the Father knows by the doctrine whether it be true. This is the real remedy for doubt.—W. J. Dawson.

Adds Life to Paper

A successful process of removing ink from old newspapers so they may be turned back into newsprint and used again has been evolved by Dr. E. H. Rhodes, professor of industrial chemistry at Cornell university. The recovered paper, he says, is just as durable as the original.

Some Assurance

"Young man, can you keep my daughter contented?"
"No, sir, but I'll keep her busy."

Says He Felt Drunk
Most of the Time

Brooklyn. Mr. Fred G. Marquart writes:—"I felt drunk most of the time. My head was dizzy. I couldn't think clearly. One day I dropped a coin and when I stooped to get it I got so dizzy I almost fell. I later found out that the cause of this condition was constipation. This was overcome by a short course of Carter's Little Liver Pills. My appetite has doubled, and my dizziness has entirely left me." Carter's Little Liver Pills move the bowels and relieve the system of its poisonous matter. Druggists, 25 & 75c red packages.
